

GETTING THE POOL SEASON READY

An easy checklist by
Nationwide Industries

- Clean the pool cover, pull it off, and store it
- Check Chlorine or salt levels to make certain chemical or salt levels are correct – this is best done in the early morning or evening
- Clean and check your pool filter to ensure proper filtration
- Ensure your pump is working correctly to properly circulate the pool water and be sure to empty your pump basket
- Be sure your pool drain is equipped with the best fitting anti-entrapment drain cover to prevent drownings
- Vacuum and brush your pool floor and walls to remove dirt and debris
- Check your security of the pool area – be sure there is a child-proof fence and gate with a latching and locking pool latch
